

# MEET PATEL

Houston, TX | 346-526-5816 | [meetpatel03690@gmail.com](mailto:meetpatel03690@gmail.com) | [linkedin.com/in/meet-patel-a090b41a3](https://www.linkedin.com/in/meet-patel-a090b41a3) | [meetpatel3690.netlify.app](https://meetpatel3690.netlify.app)

## PROFESSIONAL EXPERIENCE

**Data Analyst II** | NITU Group | Houston, TX May 2026 – Present

- Integrate and normalize data from 7 source systems (QuBeyond, FocusPOS, NCR, Toast, 7shifts, SynergySuite, Zenoti) into GCP BigQuery across 94+ franchise locations in TX, FL, and CO.
- Build and maintain dbt staging and mart models that transform raw POS, labor, and inventory data into clean, analytics-ready tables for cross-brand reporting.
- Build and maintain Power BI semantic models and daily/weekly store-level reports across five brands (Church's Chicken, Shipley's Donuts, Nothing Bundt Cakes, Cost Cutters, Supercuts), enabling leadership to track cross-brand and cross-store performance.

**Data & Insights Analyst (Student Employee)** | UHCL (OIAS) | Houston, TX Jan 2025 – Aug 2025

- Analyzed 1,000+ international student records in Power BI to uncover enrollment patterns and admission trends, informing admissions strategy and resource planning.
- Built interactive dashboards tracking key admissions KPIs, replacing manual spreadsheet workflows and delivering faster, decision-ready insights to department leadership.
- Maintained the student database for accuracy and completeness, and trained new team members on data workflows and reporting tools.
- Coordinated data reporting between Admissions and other university departments, improving cross-team data consistency.

**Data Analyst** | Archi Farming Equipment | Remote, India Jan 2023 – Dec 2023

- Co-developed Python time-series forecasting models that improved demand forecast accuracy by 22% and reduced stock-outs by 18%, lowering inventory costs and improving operational efficiency.
- Engineered automated SQL-Python ETL pipelines, cutting manual reporting effort by 40% for 10+ stakeholders and reducing data inconsistencies by 30%.
- Built Power BI and Tableau dashboards tracking inventory KPIs, and performed EDA and feature engineering on 3+ years of historical data, improving production planning efficiency by 15%.

**Data Analyst Intern** | Atmiya Developers | Remote, India Aug 2022 – Dec 2022

- Wrote and optimized SQL queries on 1.5M+ records to extract, filter, and aggregate data for product and sales team analysis.
- Built automated SQL-Python reporting scripts, reducing manual reporting effort by 30%, and ingested, cleaned, and standardized multi-source datasets for downstream reporting.
- Validated data accuracy across sources by cross-checking row counts and aggregate totals and flagging anomalies, ensuring clean, audit-ready outputs before delivery.

## PROJECTS

**Azure Databricks Spark-Based Data Engineering Pipeline** GitHub

- Built a cloud pipeline ingesting Tokyo Olympics data via Azure Data Factory into ADLS Gen2, transforming it with PySpark in Databricks, and serving it through Azure Synapse Analytics serverless SQL.
- Implemented schema enforcement, data normalization, and partitioning to produce a fully automated, analytics-ready dataset queryable with SQL.

**AWS Serverless Event-Driven ETL Pipeline** GitHub

- Developed an event-driven pipeline using AWS Lambda, triggered on S3 uploads, to convert raw nested JSON into columnar Parquet, cataloged with AWS Glue and queryable via Athena.
- Configured IAM roles, S3 event notifications, and Glue crawlers to automate the end-to-end data flow.

## EDUCATION

**University of Houston–Clear Lake** | Master of Science, Computer Information Systems | GPA: 3.65 Jan 2024 – Dec 2025

Coursework: Data Warehouse & Business Intelligence, Database Design & Data Mining, Big Data, Data Visualization

**Charutar Vidya Mandal University** | Bachelor of Computer Applications | GPA: 9.98/10 (4.0 US) May 2020 – Apr 2023

Coursework: Database Management Systems, Data Structures & Algorithms, Statistics, Python, Artificial Intelligence

## TECHNICAL SKILLS

**Programming:** Python (Pandas, NumPy, Statsmodels, Scikit-learn), SQL (Advanced), PySpark, DAX

**Databases:** BigQuery, PostgreSQL, MySQL, Databricks, SQLAlchemy

**BI & Visualization:** Power BI, Looker Studio, Tableau, Excel (Advanced), Matplotlib, Seaborn

**Cloud & Data Engineering:** GCP (BigQuery, Cloud Storage, Cloud Run functions), dbt, Azure (Data Factory, ADLS Gen2, Databricks, Synapse Analytics), AWS (Lambda, Glue, Athena, S3)
