

Meet Patel

meetpatel03690@gmail.com | 346 526 5816 | [LinkedIn](#) | [Portfolio](#) | Houston , TX

EDUCATION

Master of Science in Computer Information Systems | UHCL | Houston, TX | GPA: 3.75 **Jan 2024 - Dec 2025**

Coursework: Data Warehouse and Business Intelligence, Database Design & Data Mining, Big Data, Data Visualization

Bachelor of Computer Application | Charutar Vidya Mandal University | India | GPA: 4.0 **May 2020 – Apr 2023**

Coursework: Database Management Systems, Data Structures & Algorithms, Statistics, Python, Artificial Intelligence

TECHNICAL SKILLS

Programming Languages	: Python, SQL, SAS, R, PowerShell, VBA, DAX, PySpark
Database Technologies	: RDBMS, My SQL, Amazon Redshift, Oracle, Snowflake, MongoDB, Databricks, Hadoop
Python Libraries	: Pandas, Matplotlib, Seaborn, Sci-kit Learn, TensorFlow, NumPy
ML Frameworks	: Arima, CNN, NLP, Regression, A/B Testing, Clustering, Classification, Time Series
Data & Visualizations Tools	: Excel (Pivot Tables), Power BI, Tableau, QlikView, Alteryx, Google Data Studio
IDE & Tools	: AWS, Azure, Git, Docker, Anaconda, Microsoft Office, RStudio, Visual Studio
Certifications	: Hacker Rank – SQL, Python

PROFESSIONAL EXPERIENCE

Data Analyst | Archi Farming Equipment | India **Jan 2023 – Dec 2023**

- Analyzed **2.5M+ records** of sales, inventory, and equipment usage data using **Excel, SQL, and Python**, enabling data-driven decisions across supply chain and operations teams
- Designed and implemented **time series forecasting models** using **Python (Pandas, Stats models)** to predict **monthly and seasonal demand**, improving forecast accuracy by **22%** and reducing stock-outs by **18%**
- Conducted **trend analysis, seasonality decomposition, and moving-average modeling** on **3+ years of historical sales data**, identifying peak farming cycles and optimizing production planning by **15%**
- Built **interactive Power BI / Tableau dashboards** to track KPIs such as regional sales, equipment utilization, and inventory turnover, used by **10+ stakeholders** for weekly decision-making
- Performed **data cleaning, feature engineering, and exploratory data analysis (EDA)** on multi-source datasets, reducing data inconsistencies by **30%** and improving model reliability
- Automated **SQL- and Python-based reporting pipelines**, reducing manual reporting effort by **40%** and cutting report turnaround time from **2 days to under 4 hours**
- Partnered with sales and operations teams to translate business requirements into analytical solutions, supporting planning decisions that contributed to a **12% improvement in quarterly sales alignment**

Data Analyst Intern | Atmiya Developers | India **Oct 2022 – Dec 2022**

- Analyzed structured and semi-structured datasets using **Microsoft Excel, SQL, and Python**, supporting data-driven decision-making across product and engineering teams
- Performed **data cleaning, data transformation, and data validation** using **Excel formulas, SQL queries, and Python (Pandas, NumPy)** to improve data accuracy and consistency
- Developed **interactive dashboards and reports** using **Power BI / Tableau** to track **key performance indicators (KPIs)** and business metrics
- Processed and analyzed **1.5M+ records**, improving reporting accuracy and insight reliability by **36%** through optimized queries and structured analysis
- Automated recurring data reports and ad-hoc analyses using **SQL and Python**, reducing manual reporting time by **30%** and increasing operational efficiency.

PROJECTS

Retail Customer Behavior & Shopping Trends Analysis | Python, SQL, Power BI.

- Analyzed **100K+ retail customer transaction records** using Python (pandas) and SQL to identify purchasing patterns, repeat behavior, loyalty trends, and revenue drivers, improving insight coverage across **5+ key business KPIs**.
- Developed **complex SQL queries** (joins, CTEs, CASE statements, window functions) to answer **15+ business questions** related to subscriptions, discounts, and retention, reducing manual analysis time by **40%**.
- Built an **interactive Power BI dashboard** with **20+ DAX measures, KPIs, slicers, and drill-downs**, enabling stakeholders to explore customer segments and improving decision-making.

Amazon Sales Performance & Business Intelligence Dashboard | Python, SQL, PowerBI, Business Analytics

- Built an **end-to-end Amazon sales analytics dashboard** in Power BI by transforming raw sales data into actionable insights, tracking **4 core KPIs** (Total Sales, Profit, Quantity Sold, Profitability) across products.
- Performed **trend and product-level analysis** using DAX measures (including **YTD calculations**) to evaluate **monthly and weekly sales performance**, identify **Top 5 products**, and uncover category-wise revenue drivers.
- Designed an **interactive BI solution** with slicers, KPI cards, and Q1–Q4 filters insights.
