EDUCATION

University of Houston Clear Lake – UHCL

Jan 2024 - Dec 2025

Master of Science, Computer Information Systems – (GPA: 3.70)

Houston, TX

- **Coursework:** Data Warehouse and Business Intelligence, Database Design & Data Mining, Big Data, Data Visualization

Charutar Vidya Mandal University - CVM

May 2020 - Apr 2023

Bachelor of Computer Application – (GPA: 4.0)

Gujrat , India

- **Coursework:** Database Management Systems, Data Structures & Algorithms, Statistics, Python, Artificial Intelligence

PROFESSIONAL EXPERIENCE

Archi Farming Equipment | Data Analyst | India

Jan 2023 - Dec 2023

- Developed **automated SQL and Python ETL pipelines** to ensure accurate reporting by implementing validation and transformation logic, **reducing data inconsistencies by 30%**.
- Normalized and standardized **multi-source operational datasets** to create analytics-ready formats, improving data consistency and **minimizing reconciliation issues by 30%**.
- Optimized **complex SQL queries and transformation logic** to enhance pipeline performance, supporting **scalable high-volume reporting workloads**.
- Implemented **automated data validation and error-handling mechanisms** to ensure reliable, compliant data delivery and **improve audit readiness**.
- Documented **ETL transformation rules, data definitions, and workflows** to improve maintainability and support **long-term scalability**.
- Collaborated with cross-functional teams to design **secure, performance-optimized data solutions**, enabling data-driven operational decisions.

Atmiya Developers | Data Analyst Intern | India

Aug 2022 - Dec 2022

- Performed **ETL-style data ingestion and transformation** using SQL and Python to prepare analytics-ready datasets, improving data usability for downstream reporting.
- Standardized and validated **external multi-source datasets** to ensure accuracy and completeness, enhancing reliability of analytical outputs.
- Built **automated SQL and Python reporting scripts**, reducing manual reporting effort by 30% and improving turnaround time.
- Documented **data transformation logic and quality rules** to support repeatable, auditable, and maintainable data workflows.
- Optimized **SQL queries on 1.5M+ records** to improve processing performance and ensure reliable large-scale data analysis.

PROJECTS

Azure Databricks & Spark-Based Data Engineering Pipeline

- Built an end-to-end ETL pipeline using ADLS Gen2 and Azure Databricks to ingest, transform, and standardize raw data files.
- Developed PySpark-based transformation logic for schema enforcement, data normalization, and type validation.
- Optimized distributed processing for analytics-ready datasets and documented transformation rules and pipeline stages.

AWS Serverless Event-Driven ETL Pipeline

- Developed a fully automated ETL pipeline using AWS Lambda, S3, Glue, and Athena to process incoming JSON data streams.
- Implemented Python-based logic to flatten, normalize, and validate nested API data structures.
- Applied schema enforcement, metadata management, and optimized storage using columnar Parquet format.

Netflix Data Engineering & SQL ETL Pipeline

- Designed a raw → staging → analytics ETL architecture using Python, SQL Alchemy, and PostgreSQL.
- Implemented advanced SQL transformations, de-duplication logic, and normalization of multi-valued attributes.
- Developed validation checks and optimized SQL queries using indexing, window functions, and CTEs for scalable performance.

Amazon Sales Performance & Business Intelligence Dashboard

- Built **Power BI Amazon sales dashboard** by turning raw data into actionable insights, tracking core KPIs including **Sales, Qty Sold, and Profit**. Implemented Python-based logic to flatten, normalize, and validate nested API data structures.

TECHNICAL SKILLS

- **Programming Languages:** Python(Intermediate), SQL(Advanced), R, PowerShell, VBA, DAX, PySpark
- **Database Technologies:** RDBMS, My SQL, Amazon Redshift ,Amazon S3 ,Postgres SQL, Oracle, Snowflake, Databricks
- **Python Libraries:** Pandas, Matplotlib, Seaborn, Sci-kit Learn, TensorFlow, NumPy
- **Data & Visualization Tools:** Excel, Power BI, Tableau, QlikView, Google Data Studio, Excel-based Dashboards
- **IDE & Cloud Platforms :** AWS, Azure(Azure Data Factory, ADLS gen2,Azure Synapse analytics), Git, Docker Microsoft Office, Visual Studio
